ARTICLES COMPRISING SUPERABSORBENT MATERIALS
HAVING A BIMODAL PARTICLE SIZE DISTRIBUTION

10

ABSTRACT OF THE DISCLOSURE

15

The present invention is directed to an absorbent product including an absorbent composite containing superabsorbent material. The superabsorbent material is in the form of superabsorbent particles having a bimodal particle size distribution. Use of superabsorbent material having a bimodal particle size distribution in the absorbent structure results in enhanced capillary driven fluid distribution and enhanced fluid intake of the absorbent composite. The absorbent product may be in the form of a disposable personal care product.
